EXCLUSIVE *Line*

Exclusive surface
with a matt stamped line structure for patios and facades

Perfect match.
Patio and facade from one mould

Experience a patio and facade from one mould using our patio deck "Exclusive" and the rhombus strip "Creative exclusive". These products can be combined perfectly with matching colours and formats, helping you create unique and exceptional vibrant favourite spots – regardless whether for a small private retreat, or for commercial or urban spaces.

The exclusive line's matt stamped surface is characterised by a fine, individual line structure, creating an especially even look on the surface. The colour range offers monochrome and multi-coloured shades. From light grey to dark brown, there is a suitable colour for every style and taste.

EXCLUSIVE
Massive deck

From narrow to extra wide: "Exclusive" is now available in four different widths. The range spans 140 mm to 162 and 200 mm up to 245 mm. Its exclusive surface and slim joint gap make the patio deck equally suitable for any kind of favourite spot.

- 1 deck in 4 widths
- Large choice of colours
- Slim joint gap measurement
- No visible brackets
- High slip-resistance

Sustainable Material

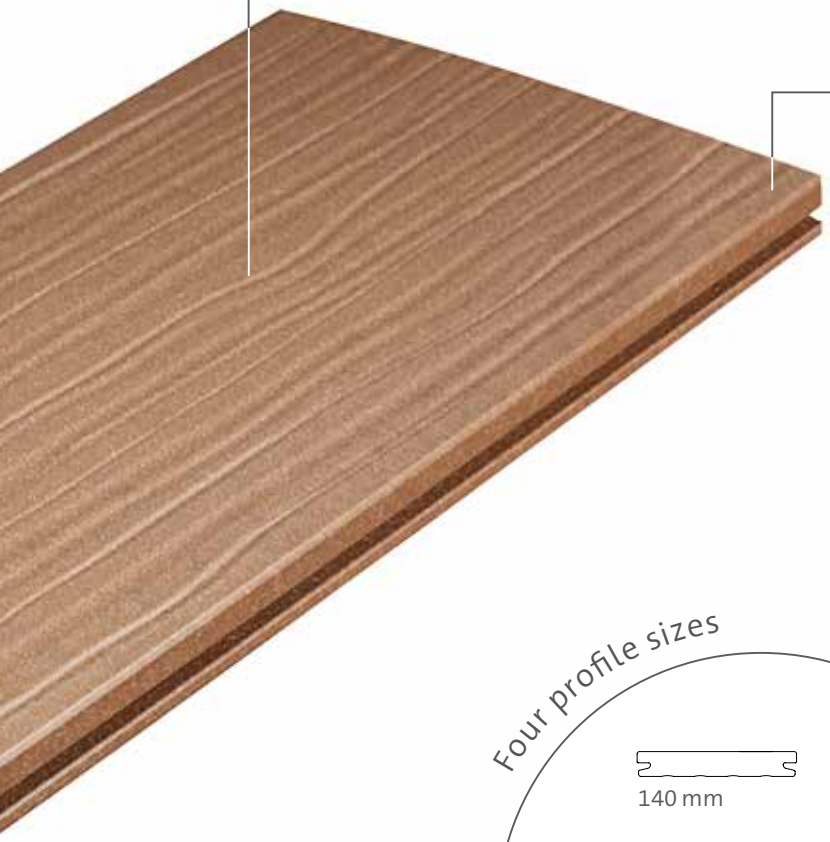
100 % recyclable

PEFC-certified

MADE in GERMANY

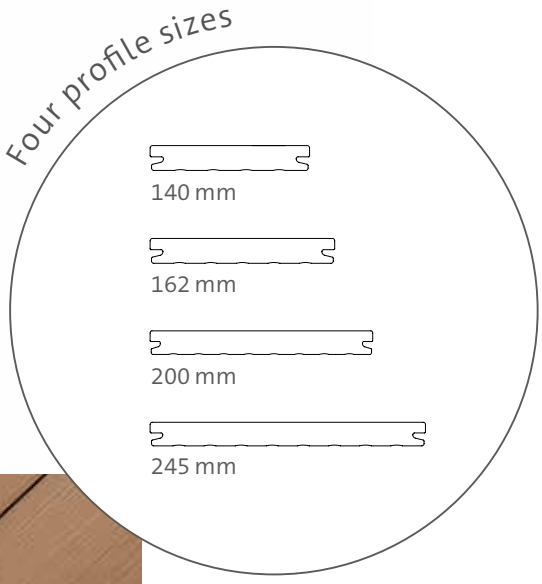
Low-maintenance surface

Weatherproof
Environmentally friendly cleaning
No oiling/painting necessary



Safe product

Suitable for toys
Slip-resistant when wet
Splinter-free



You would like to create a unique patio?
Combine narrow and wide patio decks or mix colour options to create exclusive, vibrant favourite spots you can feel good in!

Specifications

Low-maintenance

Our products are especially low on maintenance and weatherproof. In comparison to wooden decks, they need neither be oiled nor varnished and do not splinter or tear.

Recyclable

Our wood composite material consists to 70 % of domestic wood and 30 % of pure polymer (PE) with approval for use in food contact applications. We only use leftover fibres from the wood industry which we use to create durable and recyclable quality products.

Product details

Format	ca. 140 / 162 / 200 / 245 x 21 mm

patio and facade

Amber brown, multicoloured
patio and facade

Chestnut brown, multicoloured
patio and facade

Dolomite grey, multicoloured
patio and facade

Basalt grey, multicoloured
patio and facade

Lava grey, monochrome
patio and facade

Natural colour development
Our products do not contain any health or environment harming colour ingredients. We only use pigments that enable a natural colour. Our composition of materials looks very natural, thanks to a high percentage of wood (70%), which is also noticeable in the way the colours develop.

During the natural colour development process the surface of the freshly produced product is slightly shiny and the yellowish tint of the wooden fibres is visible, but after exposure to weathering this will become less again, leaving the desired, natural matt colour.

CREATIVE exclusive
Facade profile

Our facade profiles are used as a façade system both for new and already existing buildings. Combined with appropriate insulation they are installed as a suspended, rear-ventilated system. In addition, the façade profiles can be used for special constructions, such as for building carports.

- 1 profile in 3 heights
- Large range of colours
- Horizontal/vertical laying
- No visible brackets
- Quick and easy to mount
- For new buildings/renovation

Sustainable material

100 % recyclable
PEFC-certified

MADE in GERMANY

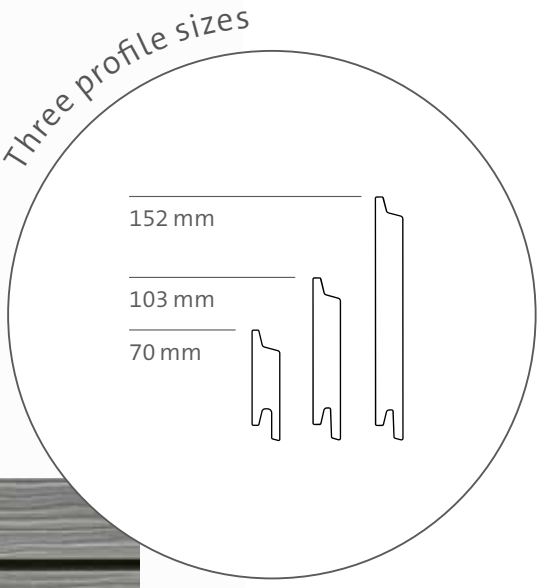
Environmentally friendly cleaning
No oiling/varnishing necessary

Safe product

Suitable for toys
Splinter-free



You would like to create a unique facade?
Combine narrow and wide facade profiles or mix colours. That is how you can create exclusive, vibrant favourite spots to feel good in!

Specifications

Simple assembly

The advantage our facade offers is how quickly and simply it can be assembled thanks to our innovative bracket system. It can be mounted rationally and invisibly, just like a façade made of wood, directly on traditional wooden battens. Therefore, you will not need any special sub-construction profiles to mount them.

Product details

Total height	small: 70 mm, xl: 103 mm, xxl: 152 mm
Area covered	small: 66 mm, xl: 99 mm, xxl: 148 mm
